### Notes:

- (1) Under publications we understand scientific journals, yearbooks, reviews, bulletins and official regularly written communications covered by an association of psychomotor education/therapy recognised by the European Forum of Psychomotricity (EFP).
- (2) Sweden, Finland and the Czech Republic do not have a specific journal of psychomotor therapy but they have connections with other associations to publish their articles.
- (3) Articles concerning psychomotor development/education/therapy are also published in other (inter-) national journals in the field of psychological, pedagogical and rehabilitation sciences.
- (4) The term "scientific" in the column means that the content is more than only information. The articles are however not all peer- reviewed.

EFP list of publications in the field of psychomotor treatment - Last adaptation 1.6.2012
